Phase 2 Hiway Service

Data requestor

- Record search:
  - Portal or EHR-integrated

Record request:
- Portal- or EHR-generated

Record response:
- Directly back to requestor (ie, portal does not RECEIVE any response information)

Phase 2 Hiway Service

Four Query-Retrieve Methods

- **Manual retrieve**
  - Find record location via portal
  - Retrieve records manually (phone, fax, etc)

- **Cross-entity viewing**
  - View other EHR within own EHR or HIE Portal
  - “SSO-like” access between participating systems

- **“Push-Push”**
  - Email-like manual process
  - Does not require new standards – leverages Stage 2 MU

- **“Query-response”**
  - Query with automated response
  - Like electronic eligibility or RX history requests
  - Requires new standards beyond Stage 2 MU
Overview of HIway Query-Retrieve Use Patterns

1. Consent to Publish Provider Relationships
2. Send demographics to RLS
3. Consent to Search or Retrieve
4. View Patient Relationships (constrained to patients with established relationships)
5. Request patient record
6. Send patient record
Future features to include single sign-on and launch from within EHRs (pending vendor collaboration)
Landing Page

- Search for Patients on the HIway
- Request a Patient’s medical record
- Area for notifications, HIway information, etc.
Search by demographic data or MRN & MRN Issuing Organization

- Only direct matches returned (no “fishing” or wild card searches allowed)
Displays Organizations having sent patient consented information (ADT message) to the HIway Relationship Listing Service (RLS)

Displays the number of encounters for each Organization and the date of the most recent ADT message sent to the HIway
- Displays basic Organization information for reference and manual retrieval
- Displays electronic retrieval options (Cross Entity Viewer or Medical Record Request)
- Electronic retrieval options displayed based on permitted query methods from both the requestor and data holder
Medical Record Request

- HIway sends request for a patient’s medical record on behalf of the requestor
- Medical record source system evaluates request and responds directly to requestor
- HIway only tracks request – no visibility of response
Option is only presented as a link to entities who have determined agreements and parameters in advance

Patient data is viewed in a separate browser window – completely independent of HPP
Discussion Item 2:
Advisory Group Discussion & Updates
• The technology Advisory Group met on August 23 to review the phase 2 design and provided valuable input on how to improve query and response transactions to enhance adoption.

• The Legal & Policy Advisory Group met on September 3 to review and comment on the policy framework for the Master Patient Index (MPI) and Relationship Listing Service (RLS) including what data is collected and persisted, what that data may be used for, and by whom.
  – Flagged payer access as a specific issue that needs further policy development in areas such as: consent, RLS access, HIPAA prohibitions on access to cash-only services.
All 4 Advisory Groups will meet in September

• The Provider Advisory Group will meet on September 17 to review and comment on the phase 2 design
• The Legal & Policy Advisory Group will meet on September 17 to review and comment on the policy framework for phase 2 consent
  – We will also convene a smaller group of provider organizations to begin developing Phase 2 consents
• The Technology Advisory Group will meet on September 20 to review and comment on the remaining detailed phase 2 design decisions
• The Consumer Advisory Group will meet on September 25 to review and comment on the phase 2 design and the patient communication approach

Hiway Monthly Webinars

- August 22 Webinar
  - 40+ attendees

Mass Hiway Use Case Workshops

Learn to develop a use case for connecting to the Massachusetts Health Information Highway (Mass Hiway) during a special workshop presented during the Massachusetts eHealth Institute Fall regional meeting series. A use case is an easy-to-understand narrative that describes how you intend to use the Hiway, the Commonwealth’s first and only statewide health information exchange (HIE). Use cases are developed with a goal in mind, which makes them a valuable planning tool for any healthcare organization.

The regional meetings are a half-day learning and networking event. In addition to learning the latest information on the Mass Hiway, attendees can keep up-to-date on the benefits of connected EHRs and the Massachusetts programs that support their adoption and use. The events will also feature presentations of health IT adoption success stories from area health care providers. Each event runs from 8-11:30 a.m. and will be held in the following locations:

- Tewksbury | Thursday, September 12 | Register
- Springfield | Thursday, September 19 | Register
- Taunton | Tuesday, October 8 | Register
- Boston | Tuesday, October 29 | Register
- Worcester | Monday, November 4 | Register

Attend a Monthly Hiway Webinar

Interested in learning about the Hiway in a live online format? Attend an interactive webinar featuring Sean Kennedy, HIE director, for MeHi. The session will address the steps needed to connect to the Hiway and review the options health care providers and related organizations have to get connected. Register to attend one of the following events:

- October 17 | 12PM - 1PM | Register
- November 14 | 12PM - 1PM | Register
- December 12 | 12PM - 1PM | Register

Major Clients slated for September/October Testing:

1. PVIX/Baystate
2. Atrius (MIIS)
3. Holyoke (MIIS)
• Transactions exchanged for August 2013 – 97,058

• Cumulative transactions to date – 1,446,634

• Testing in progress between MEDITECH platforms and HIway
  – 31 individual sites will connect to the HIway in 3 primary means (a) as an Individual organization (e.g. Jordan Hospital); (b) through an HIE (such as PVIX, Holyoke, eLINC); (c) through a parent organization (such as Partners)
• The following vendors have requested to connect to the HIway as a HISP:

• Our intent is to implement a single technical solution to solve for HISP connection
  – MA HIway and Vendor HISP will agree to trust and exchange anchor certificates
  – HISP client will need to execute a MA Participation Agreement to be “authorized” to travel on the HIway from the HISP
  – HISP customer will be listed in a “white list” or be designated as a trading partner in the MA HIway directory

• Legal agreements, Operations Support and Pricing Model implications will need to be addressed to support HISPs

• Mass HIway website going live on September 15th
