Identify lists of patients with orders and prescriptions by location and provider within a date range

Patient Profile Screen

- The patient profile tab provides a high-level view of patient information displayed in real time from the hospital's Registration, Scheduling and Clinical Systems.
- In addition to current demographics, medication, allergy and problem list, the profile displays the most recent clinical results, admissions, visits and orders. It includes links to the major subject tabs from the summary display.
- System generated alerts identify patients who are admitted, anti-coagulated, diabetic, prenatal or have antibiotic resistance (MRSA, VRE, etc)

Problems

The webOMR Problem list allows providers to create and maintain service specific problem lists. Options include:

- Enter new problems
- Edit, combine, inactivate & delete problems
- Move items on a problem list to change display order
- View the history of changes made to activate and inactivate problems
- Transfer problems from one service to another
- Associate notes to problem(s) in a patient's list. This allows clinicians to easily view notes related to a specific problem or problems
- Restrict and un-restrict the display of a problem

Results

- WebOMR provides clinicians with the ability to view laboratory results for a specific date range.
- The “All Recent” results tab displays Blood, Urine, Microbiology, Blood Bank, CSF and other fluid results
- The user can select different time frames for the display of results and expand the display to view the most recent result in each category
- Select “Single Result” to view a single result over time
- The external lab tab displays results from Mt. Auburn Hospital, BIDMC Needham, New England Baptist Hospital and Joslin Diabetes Center

Reports

WebOMR provides clinicians with the ability to view clinical reports. The user can also:

- Print reports
- View PACS Radiology Images via Centricity Web Viewer
- View Endoscopy Reports and Images
- View reports from other Caregroup hospitals
- The user can select different time frames for the display of reports and sort by report type, ordering provider and status

Notes

WebOMR displays office notes, inpatient discharge summaries and operative notes. The user can:

- View all notes or select a specific time range to view notes
- Filter to only display notes by note type, author or service
- Copy or print notes
- Forward notes to another webOMR user
- Create a new typed note or use templates to create a new note
- Edit a note that has not been signed
- Add medications and vital signs to a note
- Spell check notes
- Direct Patientsite link for enrolled patients

Medications

On the webOMR Medications tab, the clinician can:

- View active and inactive medications
- View interaction and allergy alerts
- Add, modify, renew, inactivate, hold medications
- Print medication in both a list and grid format
- Document that the medication list was reviewed with the patient
- View medications ordered at inpatient discharge (with the ability to move them over to the patients active medication list)
- Add medications as “Recording Only” (prescribed by another provider)
- Insert medication list into notes and letters to notify the next provider of care
- E-prescribe
- Identify formulary medications based on the patients insurance
- Electronically route to mail order pharmacy

Orders

WebOMR provides users with the ability to enter order for services

- Orders are electronically transmitted to receiving areas. Support staff can enter orders, but they must be signed by the ordering MD (are placed in the ordering MDs queue for signature).
- Order types include: Lab, Radiology, BMD, Ortho Tech, Pain Management, PT/OT, Cardiology, PFT, EEG, EMG, Sleep, Voice, Speech & Swallowing, Diabetets Therapy (Joslin) and GI Procudures.
- All orders are assigned a “For/By” date, after which the order, if unfulfilled, will move from the current order tab to the outdated orders tab

Sheets

WebOMR Sheets provide users with the ability to track clinical data over time on system or user defined sheets

- Results from BIDMC's Clinical Systems are automatically inserted into sheets. Sheets also allow manual entry of external results.
- System defined sheets include:
 - Periodic screening
 - Vital Signs
 - Immunizations
 - Health Education
 - Diabetes Screening & labs
 - HIV Monitoring
 - Lipids
 - Anticoagulation
 - Prenatal

Provider Schedule

For Clinicians, the clinicians schedule is displayed upon login

Clinicians can:

- Select a patient on the days schedule or another schedule (and access that patients record)
- View details specific to the patients appointment (type of visit)
- View patient arrival time or other disposition status
- View a hospitalized patient list
- Return to a recently accessed patients record
- Select a patient

Tasks

- Tasks allow providers to efficiently manage their queue of signed notes, discharge summaries and orders to be signed, review messages sent by other webOMR users and manage their patient related “to do” list.
- This is also the option used to access the Test Results Tracking System which electronically routes Radiology, Cardiology, Cytology and Pathology results to the ordering and responsible providers for their review and action.
