

Division of Acquisition Management, SAS
Room 5-101, Parklawn Building
5600 Fishers Lane
Rockville, MD 20857

February 4, 2010

Dear Ladies and Gentlemen:

You are invited to submit a proposal in accordance with the requirements of Solicitation 10-233-SOL-00061. This requirement is for The Department of Health and Human Services/Program Support Center for the Office of the National Coordinator (ONC).

The Government is limiting consideration to National Institutes of Health (NIH) Information Technology Acquisition and Assessment Center (NITAAC) CIO-SP2i Task Order holders only.

Please read the attached Solicitation carefully and prepare your proposal in accordance with the solicitation requirements. The solicitation contains the following:

SF1449

Attachments A: Description and Specifications

Attachment B: Statement of Work/Task Order Deliverables/Performance Standards and Measures

Attachment B-1: Instructions to Offerors & Evaluation Criteria

Attachment C: Non-Disclosure Agreement & Contract Administration

Prospective Offerors are requested to submit all questions and proposals through the NITAAC website. To confirm that all electronic submissions are successfully captured by the NITAAC website, please e-mail Cari Fraser at Cari.Fraser@psc.hhs.gov stating that '*company* has submitted *questions/proposals* through the NITAAC website.' Offerors must reference the solicitation number **10-233-SOL-00061** on all correspondences.

All questions must be submitted by **3:00 PM EST on February 11, 2010**. The questions and answers will be posted on the NITAAC website.

An electronic copy of your complete proposal must be received through the NITAAC website no later than **3:00 PM EST on February 25, 2010**. All proposals shall be marked with the solicitation number **10-233-SOL-00061**.

It is the Offeror's responsibility to submit all proposals by the scheduled closing date and time and in accordance with the attached "Instructions to Offerors".

This RFP does not commit the Government to pay any costs for the preparation and submission of your proposal. It is also brought to your attention that the Contracting Officer is the only individual who can legally commit the Government to the expenditure of public funds in connection with the proposed requirement.

There are similar ONC solicitations that will be issued via the NITAAC vehicle. The Government is encouraging Offerors to consider responding to those solicitations as well as this one.

If any additional information is required, please contact Cari Fraser via email at Cari.Fraser@psc.hhs.gov.

Sincerely yours,

A handwritten signature in cursive script that reads "Cari Fraser".

Cari Fraser

DESCRIPTION AND SPECIFICATIONS

1. Project Title: Standards and Interoperability Nationwide Health Information Network (NHIN) Reference Implementation
2. Period of Performance: Date of award through 24 months
3. Contract Type: Time & Material
4. Place of Performance: At the Contractor's site
5. Purpose of Contract: The purpose of this requirement is to obtain Contractor support services for developing reference implementation for Nationwide Health Information Network (NHIN). NHIN is a network developed by the Office of the National Coordinator for Health Information Technology (ONC) and is currently in a demonstration phase.
6. Background: On February 17, 2009, the President signed the American Recovery and Reinvestment Act of 2009 (ARRA). This statute includes The Health Information Technology for Economic and Clinical Health Act of 2009 (the HITECH Act) that sets forth a plan for advancing the appropriate use of health information technology to improve quality of care and establish a foundation for health care reform. The HITECH Act authorizes the Centers for Medicare & Medicaid Services (CMS) to administer incentives to eligible professionals (EPs) and hospitals for meaningful use of certified electronic health records (EHRs). These incentives are anticipated to drive adoption of EHRs needed to reach the goal of all Americans having secure EHRs by 2014. To achieve the vision of a transformed health system that health information technology (HIT) can facilitate, there are four critical prerequisites:
 - (1) Clinicians and hospitals must acquire and implement certified EHRs in a way that fully integrates these tools into the care delivery process;
 - (2) Appropriate technical, legal, and financial supports are needed to enable information to flow securely to wherever it is needed to support health care and population health;
 - (3) Standards and interoperability is achievable by the providers, consumers and industry; and
 - (4) Federal government, specifically ONC, provides an interoperability infrastructure for providers and consumers as necessary.

Nationwide Health Information Network (NHIN) is an interoperability infrastructure that has been piloted and is in its demonstration phase at ONC. NHIN is the enabler to make the HITECH priorities achievable to improve quality care, expedite care coordination, and reduce costs.

The NHIN includes a coordinated architecture of a common, secure, and trusted network which enables the exchange of health information and coordination of care among private

health networks and Federal health care providers; such as the Indian Health Services, Veterans Affairs, and Department of Defense. As patients are seen by providers from different health systems, the NHIN allows seamless transfer and sharing of health information to make it available where and when it is needed resulting in better informed decisions and improving quality of care. The NHIN integrates specifications, implementations, compliance and interoperability verification, and network operations along with a strong trust fabric into a harmonized set of activities that reduce the cost and time-to-market of health information technology interoperability. By integrating and streamlining the technical, policy, and operational components necessary to participate in a common and secure health network, the NHIN offers a method of effective and cost efficient health information exchange, especially for the mature health information exchange or federal agency that has a need to exchange information with many entities. An operational and viable NHIN will greatly increase the demand for and success of health information exchange adoption, and enable organizations to implement approved standards and achieve meaningful use targets associated with the exchange of health information.

HITECH also authorizes the establishment of several new grant programs, contracts, and studies that will address the prerequisites described above and promote wider adoption of HIT.

The priority grant programs and contracts are fundamental to realizing the promise of meaningful use of HIT that leads to improved quality, efficiency, and safety of health care. Under the HITECH Act, an eligible professional or hospital is considered a "meaningful EHR user" if they use certified EHR technology (i.e., EHRs certified against the functional criteria) and standards adopted by the Secretary, including but not limited to e-prescribing and the electronic exchange of information for the purposes of quality improvement, such as care coordination. In addition, eligible professionals and hospitals must submit clinical quality and other measures to HHS.

Meaningful use incentives will be available to health care providers beginning in FY 2011 based on their Medicare and Medicaid coverage status and other statutorily defined factors. This includes eligible health care professionals and acute care hospitals and takes into consideration adjustment factors for children's hospitals and critical access hospitals. The detailed criteria to qualify for meaningful use incentive payments will be established by the Secretary of HHS through the formal notice-and-comment rulemaking process.

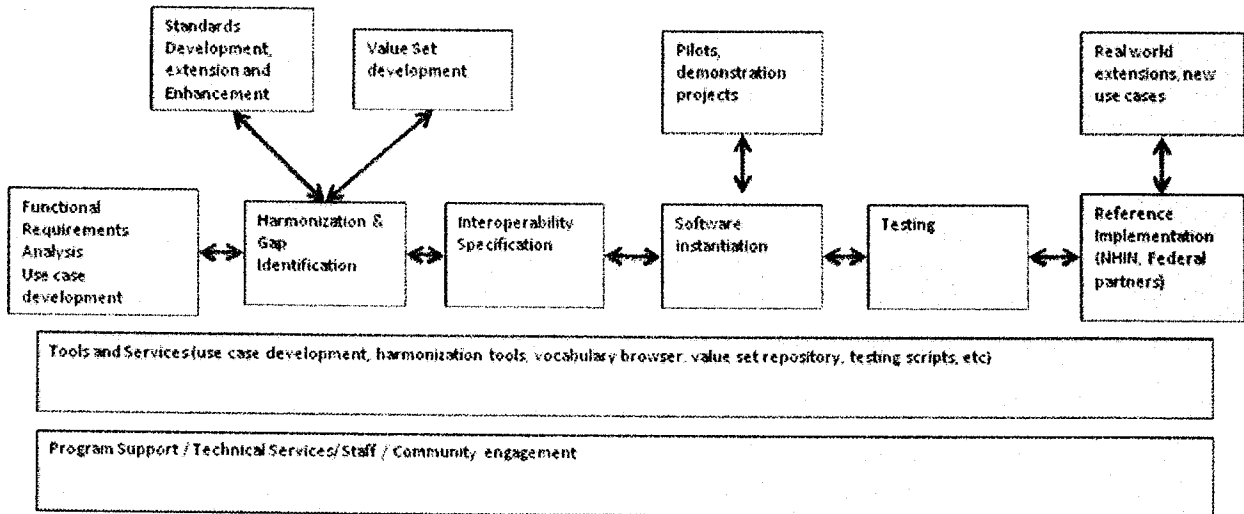

The HITECH Act also requires these meaningful use criteria to become more stringent over time. In 2015, providers are expected to have adopted and be actively utilizing an EHR in compliance with "meaningful use" or they will be subject to financial penalties under Medicare. The information exchange requirements for the meaningful use EHR incentives, as specified in the regulation currently under development, will inform a strategic framework for this requirement. Any goals, objectives, and corresponding measures of meaningful use that require Health Information Exchange (HIE) over time will be the reference point for the developers.

A key component of "meaningful use" is certified electronic health records and key certification criteria. The electronic health record is interoperable and adheres to standards adopted by the Secretary. ONC has developed an interoperability and standards

framework that has several key steps and NHIN is a critical component of the framework. The overview of framework is provided below.

Overview of Standards and Interoperability Framework

Interoperability/Standards processes

This framework is a life cycle for the development of standards and interoperability specifications and is meant to establish a sustainable set of tools and processes that will streamline and coordinate the development of standards and interoperable software solutions to support the goals of the HITECH Act.

This framework can be effective only when each task is well coordinated with other tasks in the process i.e., the output from a task can be a critical input to another task. Some activities may focus only on a single task within the framework; whereas certain activities such as community engagement and architectural support may span multiple tasks. Therefore it is important that all contractors working on various tasks within this framework collaborate with others.

Widespread adoption and meaningful use of HIT is one of the foundational steps in improving the quality and efficiency of health care. The appropriate and secure exchange of information is a critical enabler of a high performance health care system. The overall purpose of the ONC programs is to facilitate and expand the secure, electronic movement and use of health information among organizations according to nationally recognized standards.

The standards and interoperability framework will support all ONC programs and effort in increasing adoption of health IT across the entire health care enterprise.

7. Government Furnished Information: The relevant information about NHIN can be found on ONC website <http://healthit.hhs.gov/NHIN>

8. Government Furnished Property: All contractor personnel will be required to work offsite at the contractor's designated facilities or as directed.

9. Rights in Data: All data produced under this task order is the property of the Government. The Contractor agrees not to disclose, verbally or in writing, information pertaining to the results or findings of work (including data base files, analyses, draft or final papers and reports) for the period of this task order under this contract without obtaining prior written approval of the COTR. The Contractor must request approval in advance (minimum 21 days prior to release) and in writing, specifying: who or what is generating the request for advance information; when and how project results/information would be released; and what information would be released. Failure to receive response to the COTR does not constitute approval for releasing information.

Statement of Work

The objective of this task order is to develop a modular NHIN reference software implementation (RI) to support the development, testing, and adoption of the planned NHIN capabilities. The NHIN reference implementation must be conformant to NHIN specifications and be built on open non-proprietary technologies. The Contractor's activities shall include the development of a conformance test suite with at least one trusted implementation for each interface to discover errors or ambiguities in the specification; verify the specification is implementable; enable the creation of a test suite; serve as a Benchmarked Standard against which other implementations can be measured; and help to clarify the intent of a specification where conformance tests are inadequate.

A. Reference Implementation Overview

A NHIN Reference Implementation (RI) includes implementation of a set of service interface specifications to benchmark the feasibility of these specifications. The current set of NHIN services includes:

Service Name	Description	Link to Specification
NHIN Messaging Platform Specification	Standards-based specifications set including SOAP, HTTP, PKI and HL7 v3.0 RIM-based messages that allow messaging across the NHIN.	Specification (Draft R1)
NHIN Service Registry	A common, curated network registry that allows the discovery of other NHIN participants and the services they offer on NHIN Full.	UDDI 3.0 Specification
NHIN Authorization Framework Specification	Standards-based specifications supporting the verification of trusted health information exchange across the NHIN.	Specification (Draft R1)
NHIN Patient Discovery Specification	Specifications allowing NHIN participants to exchange demographic information to mutually establish the identity of a patient.	Specification (Draft R1)
NHIN Query for Documents Specification	Specifications allowing NHIN participants to locate patient-specific documents held by other NHIN participants.	Specification (Draft R1)
NHIN Retrieve Documents Specification	Specifications allowing NHIN participants to retrieve patient-specific documents held by other NHIN participants.	Specification (Draft R1)

NHIN Access Consent Policy Specification	Specifications defining the content and format of an access consent policy document.	<u>Specification (Draft R1)</u>
NHIN Health Information Event Messaging (HIEM) Specification	Specifications allowing NHIN participants to indicate their desire to subscribe or unsubscribe to content and to send notifications when content matching a subscription has been created or modified.	<u>Specification (Draft R1)</u>
Geocoded Interoperable Population Summary Exchange (GIPSE) Profile	Specification defining how NHIN services may be used to exchange CDC GIPSE data.	<u>Specification (Draft R1)</u>

During the development of a conformance test suite, at least one trusted implementation of each interface is necessary to:

- Discover errors or ambiguities in the specification;
- Verify the specification is implementable;
- Enable the creation of a test suite;
- Serve as a Benchmarked Standard against which other implementations can be measured; and
- Help to clarify the intent of a specification where conformance tests are inadequate.

The remainder of this section enumerates the list of requirements for the NHIN reference implementation.

B. Software

The RI shall implement the NHIN services specifications, as well as all new specifications currently under development and into the future. The implementation shall include only what is necessary to reflect the complete intent of a specification.

The RI must be based on freely available components as open-source or open license software. The RI shall be made easily available for download and shall require no proprietary or for-cost licensing to deploy.

The RI may include additional components such as a Master Patient Index (MPI), adapters, translators, etc. at the direction and request of the COTR.

The RI shall be designed, developed, and published in a modular fashion whereby each functional component can easily be built and deployed separately by users.

The RI shall be developed concurrently with the new service requests and be updated at

the end of every Specification Factory release that results in completed specifications. Each RI release shall include: a software implementation of the current specifications; build and deploy scripts for components; documentation; and appropriate release notes that identify the additions and changes to the release.

i. Distribution

The RI shall be distributed free of charge under an open license. The means of distribution will be determined by the COTR.

ii. Testing

The reference implementation will be tested for conformance to the NHIN specifications and for interoperability with other solutions. The RI development process should ensure normal unit testing as well as other development cycle based testing in accordance with good software engineering practices.

The RI must pass the NIST conformance testing suite and the NHIN interoperability test suite at each release.

iii. Support

Bugs identified when using the RI, or limitations discovered after release that do not relate to a specification, should be reportable using a process that will be negotiated with the COTR.

Identified defects should be addressed in a timely fashion and included in future releases of the RI.

The Contractor must exercise and enforce all applicable Department of Health and Human Services (HHS) regulations and directives, and shall coordinate with public and private organizations, stakeholder groups, and industry in accomplishing these tasks.

The Contractor shall maintain a level of technical expertise necessary to satisfy the requirements of executed task assignments.

In parallel with the incumbent contractor providing all current support, the Contractor shall provide a one-month transition phase to assume all support from the incumbent Contractor described in following specific tasks by 1 May 2010. If the incumbent is selected, there will be no transition phase. The incumbent Contractor is Harris Corporation.

C. Summary of Tasks

The Contractor shall accomplish, but is not limited to, the following tasks listed below:

1. Contract-Level and Task Order (TO) Management
2. Specification Requirements
3. Reference Implementation Development
4. Reference Implementation Validation
5. Reference Implementation Deployment

Outcomes/Objectives to be accomplished for the Specification of Tasks below include, but are not limited to:

Task 1 – Contract-Level and Task Order (TO) Management

1.1 Contract-Level Program Management:

- a. The Contractor shall provide the technical and functional support needed for program management of this SOW including productivity and management methods, such as quality assurance, configuration, work breakdown structure, and resource management.
- b. The Contractor shall coordinate organizational requirements, manage projects and schedules, and report progress/issues to COTR.
- c. The Contractor shall provide the centralized administrative, clerical, documentation, and other related functions.

1.2 Task Order Management:

The Contractor shall prepare a Task Order Management Plan describing the technical approach, organizational resources, and management controls to be employed to meet the cost, performance, and schedule requirements throughout the task order execution.

1.3 In Progress Review Support:

The Contractor shall provide a monthly progress report monitoring the task management, quality assurance, and configuration management applied to the task order.

1.4 Post Award Meeting:

The Contractor shall meet with the Contracting Officer Technical Representative (COTR) and other ONC staff, to discuss the objectives of the task order and any related project issues within two weeks after award. A written agenda for the meeting shall be prepared by the Contractor and sent to the COTR three (3) days

prior to the meeting.

Task 2 – Specification Requirements

The Contractor shall participate in the NHIN specifications development effort in order to:

- a. Provide input on implementation dependencies to the development of the NHIN specifications;
- b. Plan and prioritize development activities in concert with the specifications development; and
- c. Coordinate releases of RI with the releases of specifications.

Task 3– Reference Implementation Development

The Contractor shall develop the software reference implementation of NHIN capabilities. The Contractor shall:

- a. Follow industry best-practices and methods of software development to ensure the production of timely and quality software;
- b. Develop software components that implement the NHIN specifications;
- c. Develop software components that are freely available to users via either open-source or open-license;
- d. Develop software components outside of the NHIN specifications that enhance health information exchange capabilities of the RI at the discretion of the COTR;
- e. Develop software in a modular fashion, allowing users to utilities components of RI without significant dependencies on other RI components;
- f. Make available source code for each individual functional components of the RI; and
- g. Function as team member(s) within the larger interoperability framework.

Task 4 – Reference Implementation Validation

The Contractor shall test each release of the RI for conformance to the NHIN specifications and interoperability with other solutions. The Contractor shall:

- a. Test and verify that each RI release is in conformance with NHIN specification via authoritative NHIN test cases, data and tools; and
- b. Test and verify that each RI release can interoperate with other implementations via the NHIN interoperability test infrastructure.

Task 5 – Reference Implementation Deployment

The Contractor shall make the RI available for deployment to end users. The Contractor shall:

- a. Make releases of the RI available via a publicly accessible website. The site and process for publication will be specified by the COTR;
- b. Develop and publish a deployment unit for each functional component of the RI. A deployment unit consists of a build (an executable collection of components), documents (end-user support material and release notes) and installation artifacts; and
- c. Develop tools as necessary to support the development, maintenance, and release of the RI.

D. Items to be Delivered and Delivery Schedule

All deliverables must be provided to the COTR in electronic format, unless otherwise specified, according to the appropriate schedule. Items specified for delivery are subject to the review and approval of the COTR before final acceptance. The COTR will respond to submitted deliverables within 2 weeks of their receipt. The contractor shall make revisions as deemed necessary by the COTR.

Deliverables Schedule

Deliverables	Completion Date – time after award
TASK 1: Contract and Task-Order Management	
Initial face to face	Within 2 weeks of award
Task Order Management Plan	Within 6 weeks of award
Monthly Reports	Monthly
Post Award Meeting Agenda: Provide written agenda for Post Award Meeting	3 days prior to Post Award Meeting
TASK 2: Specification Requirements	
Requirements Management Plan: Plan that specifies how the RI team will integrate into the NHIN specifications process and manage new requests for capabilities.	Within 1 month of award, then updated as necessary
Product Backlog: Descriptions of all capabilities ordered by priority set by NHIN governance and processes.	Within 1 month of award, then updated weekly
TASK 3: Reference Implementation Development	
RI Development Plan: Schedule and tasks to develop each release of the RI.	Within 1 month of award, then updated monthly
RI Source Code: Source code for each functional component of the RI	Per Release of RI
TASK 4: Reference Implementation Validation	
NHIN Conformance Test Report: Report validating that the RI conforms to the NHIN specifications relevant to that release	Per Release of RI
NHIN Interoperability Test Report: Report validating that the RI passed interoperability tests within the NHIN Interoperability Lab	Per Release of RI
TASK 5: Reference Implementation Deployment	
RI Deployment Units for each functional component of the RI: A deployment unit consists of a build (an executable collection of components), documents (end-user support material and release notes) and installation artifacts.	Per Release of RI
Section 508 Annual Report. See HHSAR clause 352.270-19(b).	Submit report to the COTR
